## Proposed Sullivant Avenue Improvements Georgesville Road to Dodge Park/Scioto Trail

### Description:

- The proposal includes:
  - Adding bicycle oriented signage and sharrow pavement markings on Sullivant Avenue from Georgesville Road to S. Hague Avenue.
  - Adding bicycle oriented signage and sharrow pavement markings from S. Hague to Yale Avenues, adding full-time parking on one side and two-way left turn lane.
  - Adding signage and sharrow from S. Yale Avenue to Grubb Street (Dodge Park) and connecting to the Scioto Trail.

### Benefits:

- More clear roadway markings have been shown to improve safety.
- Reducing the number of travel lanes has been shown to slow traffic speeds and increase safety for pedestrians, bicyclists and motorists.
- Better serve the increasing number of people riding bicycles to reach schools, jobs and other destinations.
- Consistent with the Bicentennial Bikeways Plan to improve biking connectivity throughout Columbus to create a more active and bike-friendly community.

**Schedule:** Proposed changes are scheduled to be implemented in 2014.

### Costs:

Design \$153,947

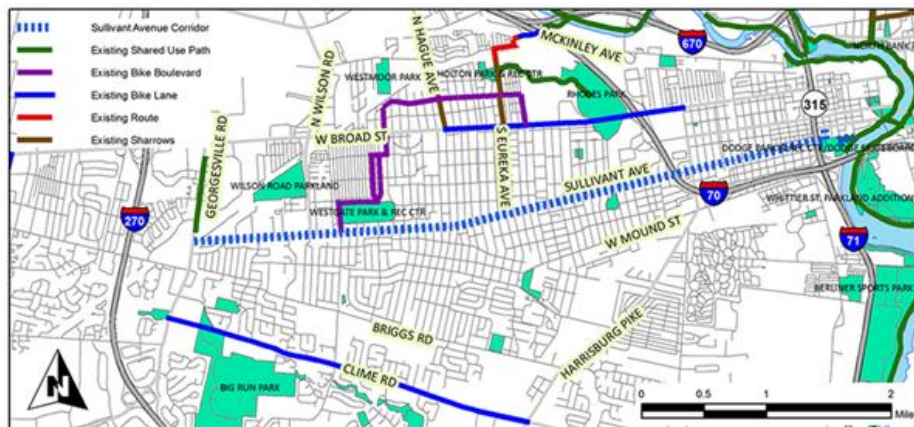

Construction and inspection \$600,000 (estimated)

### Contact Information:

Design Project Manager: Nick Popa, P.E., tel. (614) 645-0543

Designer: Michael Baker Corporation

Contractor: TBD

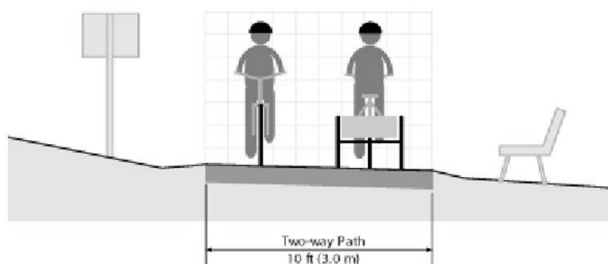

## Project Overview

As of July 1, 2013

## Proposed Sullivant Avenue Improvements Camp Chase RR to Dodge Park/Scioto Trail

Shared lane markings, or "Sharrows," remind motorists that bicyclists are sharing the lane, and may provide guidance to where bicyclists should ride within the traffic lane.

*A new, 10-ft wide shared-use bike and pedestrian path would run along side Georgesville Road between the two Sullivant Avenues.*
